

Preparing the rear strap. Note the Loop in the middle. The safety leash strap will lock there.

Thread each end through the foam body.

QPS

Completed

The two containment straps that will be attached to the rear strap.

Shows the Containment strap attached to the rear strap. **However**, do not do this step until after the cover is installed.

QPS

Place the cover on top with the hole facing to the rear. The loop on the rear strap will come through this hole with the gold ring

QPS

Thread the rear strap through each side of the cover.

Image shows the rear strap threaded through body and cover.

QPS

This image shows the loop on rear strap threaded through the gold ring hole.

QPS

Attach the  
containment straps to  
the rear strap using  
the male/female clips

QPS

Safety leash strap that will attach in the middle of the rear strap. Notice - at this point the one you have may or may not be locked in a circle as this one is.

QPS

If your leash strap is locked in a circle, Unlock it & Thread it through the loop on the rear strap

Relock the safety  
leash strap.

QPS

Done with the rear part of the Console Lookout.

QPS

The Front strap,  
with slider  
removed.

QPS

Thread it through one side of the front cover and front of foam body.

Same as above,  
threading through  
the foam after  
having threaded it  
through the cover.

QPS

Thread through  
the foam body at  
the other end.

Pic 75

QPS

And then thread it through the cover.

QPS

Turn over and zip  
up the cover

QPS

Completed except  
for putting on the  
slider.

QPS

Picture of the slider which was removed when the cover was taken

QPS

All the following pictures demonstrate how to thread the slider and male/female lock on the strap. Here it goes through the back part of the slider first

Loop it up, and  
then down through  
the front of the  
slider.

Slider is on.

QPS

This picture and the following pictures show doing the same with the male/female lock.

QPS

QPS

QPS

Completed.
